# CONTINUOUS EVOLUTION TOWARDS EXCELLENCE

ESTIL GURU S.L.U. is a well-established family company in the **construction sector** with a proven track record in the market and strong business stability. The company has grown through the manufacturing and marketing of **waterproofing products**.

GURU's goal is to integrate **innovative products**, supported by thorough research, into new proposals for construction solutions. This approach drives us to create dependable products that meet our customers' expectations while providing the necessary personal and technical support.

**With a presence in five continents**, Estil Guru boasts an exceptional team and extensive experience in manufacturing waterproofing membranes, Italian-style shower systems for on-site showers, and various accessories for professional ceramic tile installers. Our products meet the highest quality **standards** set by the European Union and are certified by external laboratories such as IAPMO, CSTB and KIWA.

## Estil Guru passes the EDP with flying colours!

At Estil Guru, we are proud to inform you that we have obtained the EPD. This objective evaluation shows the environmental impact of our WATER-STOP product.

### The EPD is not just a certification, but also a commitment to the environment

The **Environmental Product Declaration** is a thorough evaluation that examines the environmental impact of a product throughout its entire life cycle. At Estil Guru, we aim for both high performance and transparency. By obtaining and sharing the EPD, we demonstrate our commitment to accurately assessing the environmental impact of our products.

### Key points analysed in the EPD:

1. **Raw material extraction:** our WATER-STOP waterproofing membrane is manufactured using responsibly selected raw materials to minimise the impact on biodiversity.
2. **Production process:** we use advanced, energy-efficient technologies to eliminate emissions and optimise every stage of the manufacturing process.
3. **Sustainable packaging:** we aim to reduce waste by using recyclable and minimalist packaging materials.
4. **Product Lifetime:** our WATER-STOP waterproofing film is designed for long-lasting performance and reduces the need for replacement, minimising waste generation.
5. **End-of-life:** we design our products with materials that can be easily separated and processed at the end of their useful life, making recycling more efficient.

### WATER-STOP: unrivalled performance, guaranteed sustainability

- » Versatile uses: whether for showers, terraces, shelters or swimming pools, WATER-STOP is the ultimate choice for waterproofing. This product's advanced formula creates a water-resistant barrier that effectively and durably protects every corner of your space.
- » EPD: certified environmental success: the WATER-STOP waterproofing membrane offers an unparalleled solution for your waterproofing needs while promoting environmental responsibility. Every aspect of the product's life cycle has been carefully analysed, from the extraction of raw materials to its end of life, to ensure optimal environmental impact and sustainability.
- » Exceeding all points of the EPD: WATER-STOP stands out by exceeding all critical points assessed in the environmental product declaration. Our commitment to environmental excellence is reflected in every aspect of our operations, from responsible raw material selection to efficient production processes and sustainable packaging.
- » Extra sustainability: Estil Guru WATER-STOP is distinguished by its use of up to 60% less plastic than its competitors, demonstrating our commitment to reducing plastic waste without compromising on performance or protection. Furthermore, due to its extended shelf life, there is no need for product refurbishment or renewal.

### Specific applications:

6. **Showers:** WATER-STOP creates an impenetrable barrier in showers, preventing leaks and protecting underlying structures from water damage.
7. **Terraces:** transform your terrace into a water-resistant space with WATER-STOP. This product provides a durable protective layer against the elements.
8. **Shelters:** shelters are protected from leaks and dampness thanks to advanced WATER-STOP technology, reducing the cost of repairing structural risks caused by dampness.
9. **Swimming pools:** WATER-STOP waterproofing film is the ideal choice for preserving the surrounding structure of your pool and resisting water, keeping it in perfect condition.

### Estil Guru: protection, innovation and environmental commitment

By choosing WATER-STOP, you not only ensure a superior waterproofing solution for your most precious spaces, but you also contribute actively to the preservation of the environment. WATER-STOP is a highly sustainable waterproofing solution, as verified by EPD. Join us on the journey towards sustainability, where performance excellence meets environmental responsibility.

# AT THE FOREFRONT OF WATERPROOFING

More flexible

More resistant

Longer duration

Easier to install

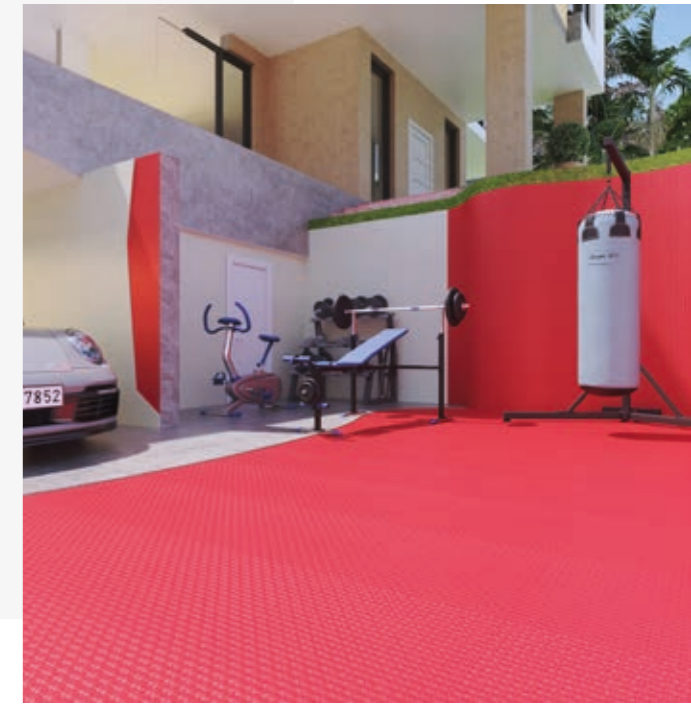

Greater time savings

At Estil Guru, innovation is at the core of our mission. We are proud to have pioneered the design of waterproof EVAC-type membranes using the combined extrusion method.

Our waterproofing membranes are designed to cover all areas of home waterproofing, including exteriors, interiors, and swimming pools.

Each of our geotextile waterproof membranes is designed, engineered, and manufactured to achieve unique specifications.

WATERPROOF MEMBRANE **WATER-STOP**

Scan the QR code and discover more

**Features**

- » High mechanical grip
- » Bridges cracks and allows small movements.
- » Minimum installation height
- » Lightweight and safe
- » More flexible than most waterproof membranes
- » Easy installation
- » Excellent for both new builds and renovations
- » Economical and reliable solution

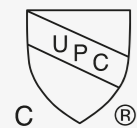

**Specifications**

- » Weight/m<sup>2</sup> (gr): 250
- » Width (m): 1, 1'5, 2, 3
- » Length (m): 5, 10, 20, 30, 40
- » Pull out:  
≥ 0,7 N/mm<sup>2</sup> = ≥ 70 tons/m<sup>2</sup>

**CSTB**  
AVIS TECHNIQUE CSTB – NORMATIVE

## SIZE MATTERS

At GURU, we believe that size is important, especially when it comes to our new 3-metres high WATER-STOP film roll. Thanks to this new size, you can achieve **perfect adaptability** for both small and large projects. Furthermore, this new format offers flexibility and **optimises installation time, cost, and material** by reducing the number of joints required for installation.

**+ SIZE**  
**+ ADAPTABILITY**

**- WASTE**  
**- OVERLAPS**  
**- RISK**

## AVAILABLE SIZES

Available in a **variety** of roll sizes to suit your needs, discover limitless versatility with our range of WATER-STOP waterproofing membranes. Our wide range of options gives you the flexibility to achieve accurate and efficient application from small projects to large areas. Designed to offer bespoke solutions, the unparalleled adaptability of our rolls will simplify your sealing experience.

# UP TO 3 METRES HIGH!

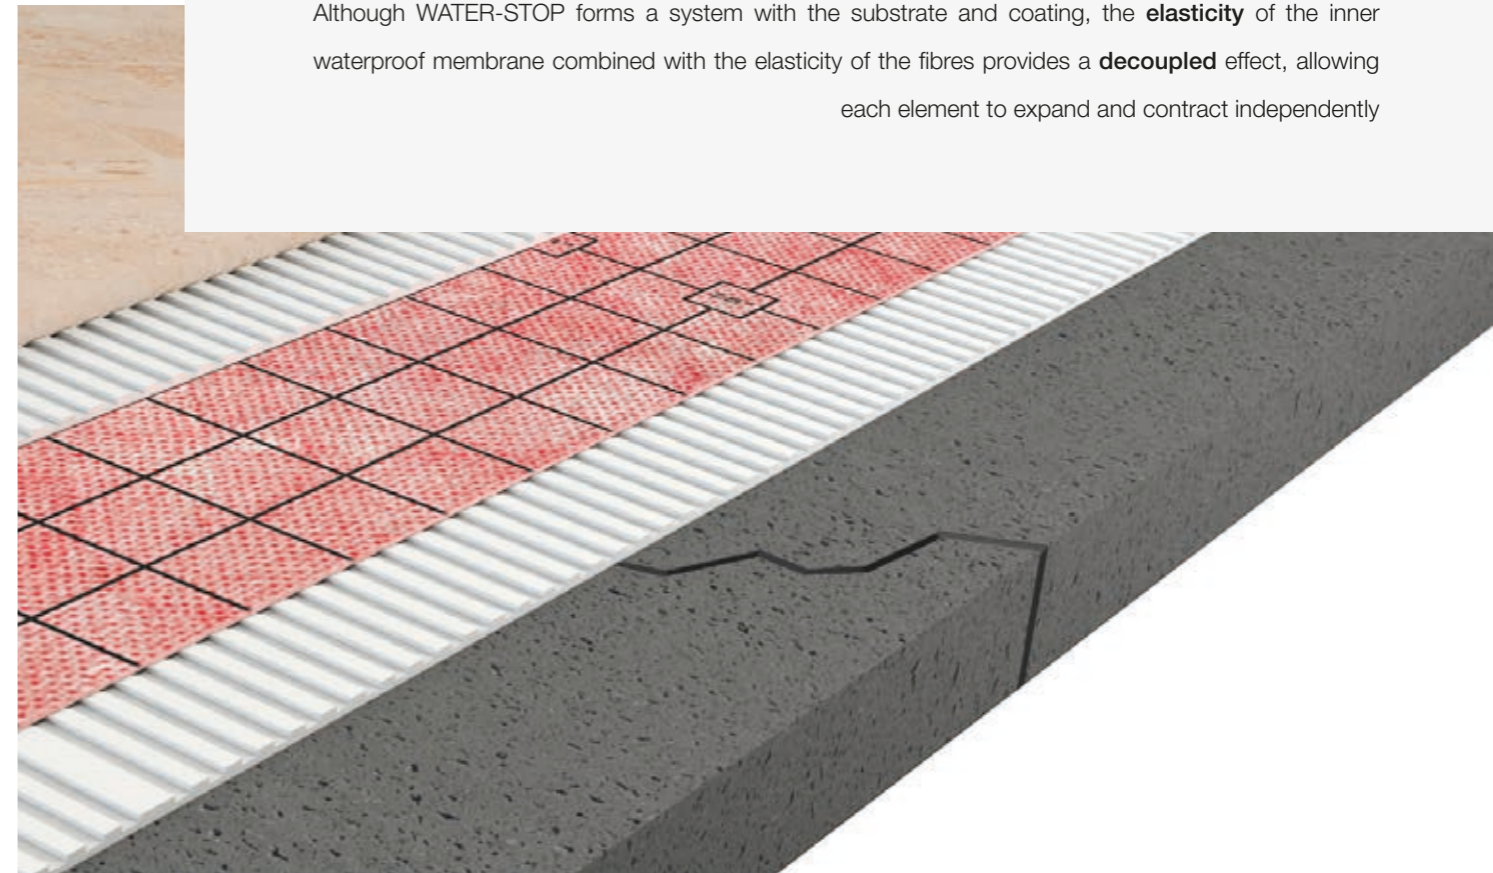

**RENOVATIONS ARE NO LONGER A PROBLEM!**

WATER-STOP is a minimum 2cm thick waterproofing membrane without additional layers. Ideal for the renovation of terraces and balconies where other types of waterproofing have deteriorated. Solves problems such as leaks and stains caused by damp conditions. Its advantage is that it does not exceed the height of the access to the houses and **can be installed directly on the existing pavement**. It simplifies the renovation process, maximises efficiency and ensures a flawless finish.

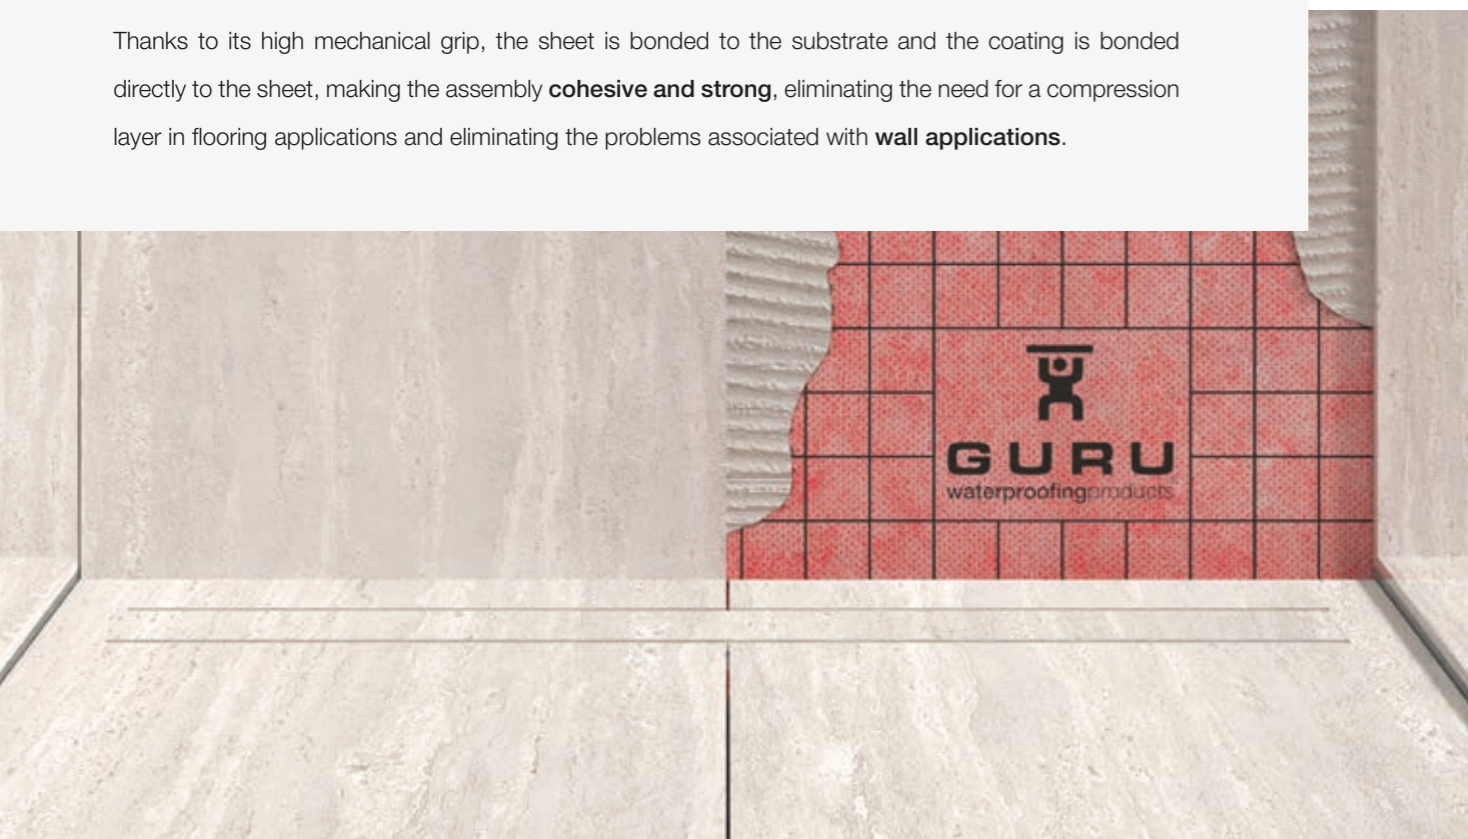

**BRIDGES CRACKS AND ALLOWS SMALL MOVEMENTS**

Although WATER-STOP forms a system with the substrate and coating, the **elasticity** of the inner waterproof membrane combined with the elasticity of the fibres provides a **decoupled** effect, allowing each element to expand and contract independently

**HIGH MECHANICAL GRIP**

Thanks to its high mechanical grip, the sheet is bonded to the substrate and the coating is bonded directly to the sheet, making the assembly **cohesive and strong**, eliminating the need for a compression layer in flooring applications and eliminating the problems associated with **wall applications**.

**MUCH MORE FLEXIBLE THAN ANY OTHER WATERPROOFING MEMBRANES**

With WATER-STOP, it is easier to solve the most **complicated points** of any installation, such as corners, floor-to-wall joints, joints with building elements...

# WHY CHOOSE WATER-STOP?

## ANALYSIS OF GENERAL WATERPROOFING METHODS:

**WATER-STOP:** a film composed of 4 polymer layers, 2 inner layers of polyethylene in film form and 2 outer layers of fibre for mechanical anchoring of cement.

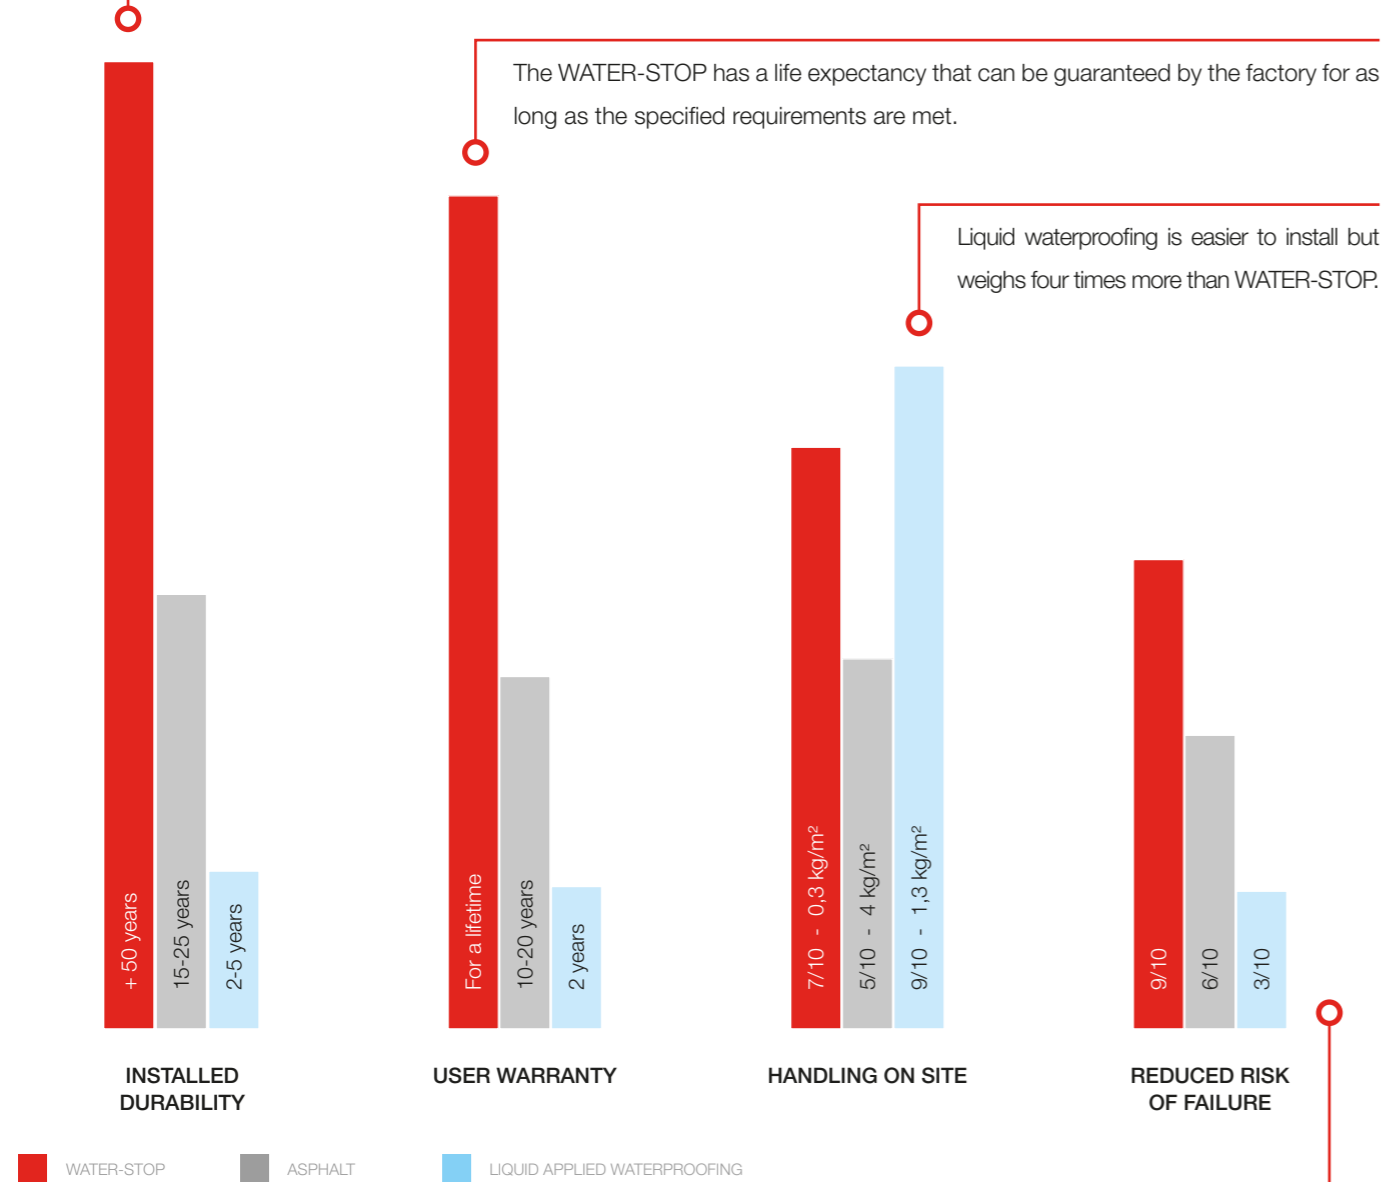

**ASPHALT:** bituminous membranes that are manufactured by impregnating paper or fibreglass matting with pitch or bitumen and added with plasticisers.

**LIQUID APPLIED WATERPROOFING:** products made from dissolved polymers. The materials used for this purpose can be rubber or polyurethane-based, polyureas, or waterproof cements.

The polymers that make up WATER-STOP do not degrade once installed. They retain their properties permanently. Asphalts require additive plasticizers, but these deteriorate over time and the asphalt loses elasticity and becomes brittle. Paints cannot withstand the constant mechanical stress of weathering. They will eventually crack.

The WATER-STOP has a life expectancy that can be guaranteed by the factory for as long as the specified requirements are met.

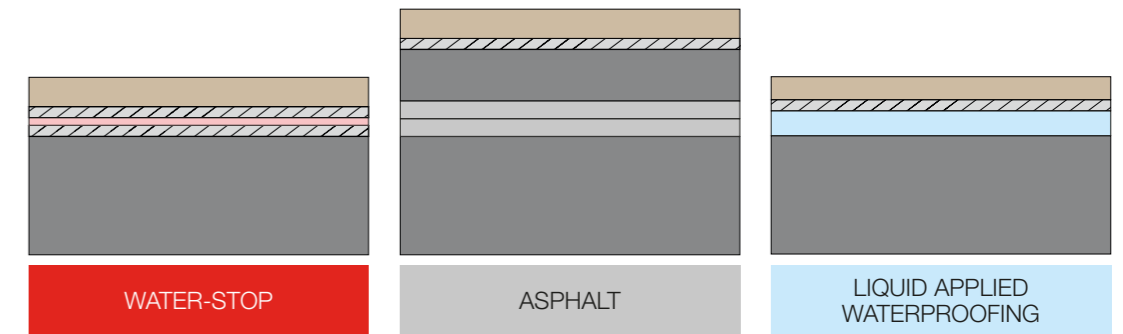

Liquid waterproofing is easier to install but weighs four times more than WATER-STOP.

Liquid waterproofing, although easy to install, carries a higher risk than waterproofing membranes, which ensure watertightness through controlled and audited production processes. In addition, the expected result of liquid sealing can be altered by environmental factors such as humidity, temperature or wind. WATER-STOP is bonded without the need for heat application, unlike asphalt, reducing the risk involved.

## INSTALLATION FEATURES

### 1. HEIGHT

	WATER-STOP	ASPHALT	LIQUID APPLIED WATERPROOFING
TOTAL HEIGHT	2 cm	7 cm	2 cm

W-S BUTIL

UNCOUPLING MEMBRANE **G-FLEX**

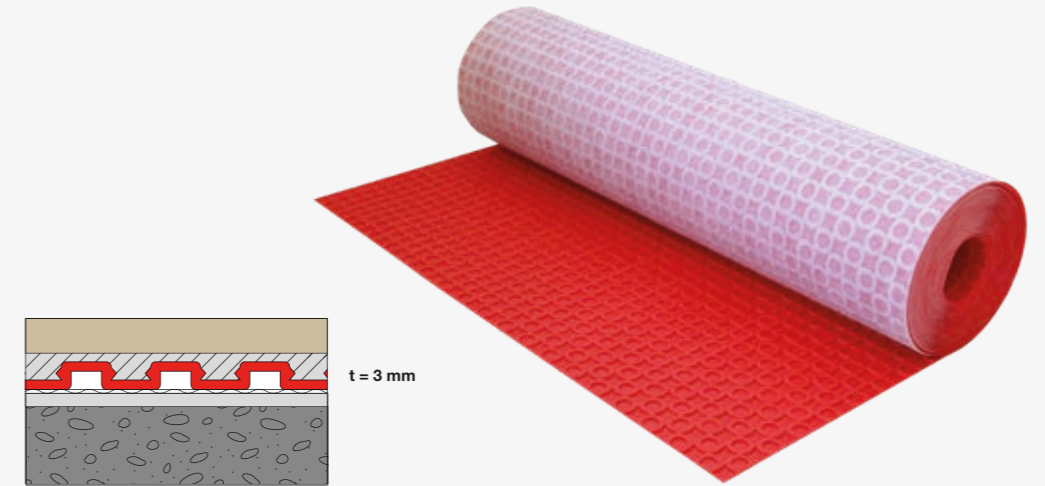

Scan the QR code and discover more

Waterproofs the surface, protects the ceramic.

- No breakages
- No cold zones
- No dampness

**Features**

- » Uncoupling
- » Load sharing capacity
- » Better heat distribution
- » Decoupling
- » Vapour and moisture management
- » Waterproofing

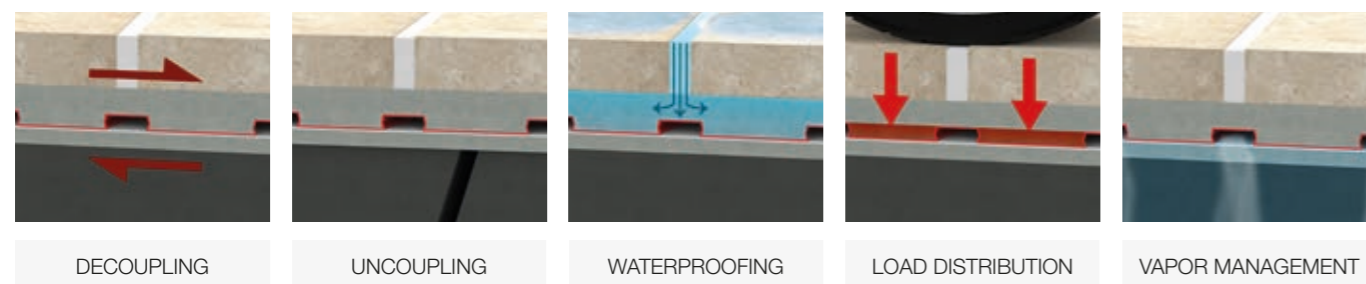

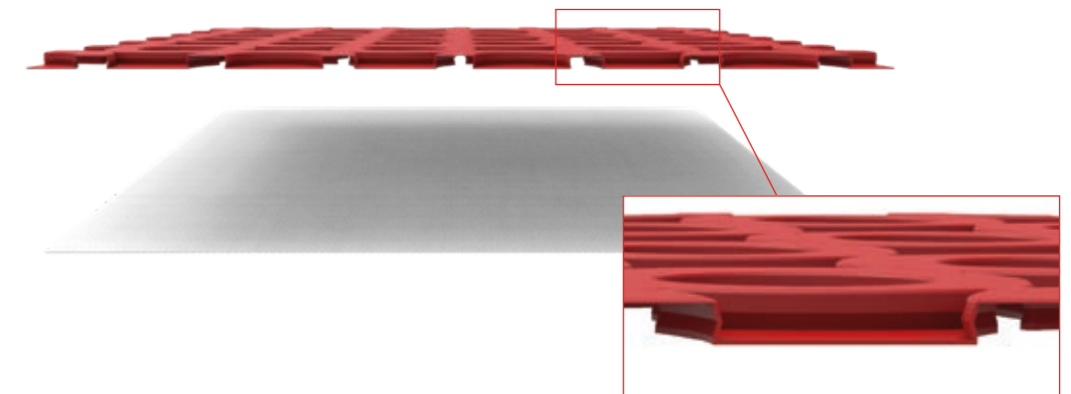

**Specifications**

- » Weight/m<sup>2</sup> (gr): 550
- » Width (m): 1
- » Length (m): 14, 30
- » NAIL - Mechanical anchor
- » Adherencia: 75 tons/m<sup>2</sup>
- » Robinson Floor Test - Extra Heavy

G-FLEX is a **waterproof and anti-fracture uncoupling membrane**. G-FLEX membrane waterproofs and protects any surface, old or new, wet or dry, cracked or subject to dimensional movement.

Furthermore, it **reduces on-site installation time** as the cladding can be installed and laid **without any waiting period**. This means that **the installation can be walked on immediately**. It also plays a crucial role in **underfloor heating** installations due to its ducts that distribute heat evenly across the entire surface.

Due to G-FLEX's effectiveness in moisture release from the slab in new constructions, there is a significant reduction in waiting time for ceramic installation, completing it in less than 28 days, resulting in a savings of up to two weeks in the construction process. This same moisture **dissipation capability** makes it ideal for renovations in areas prone to rain, even on previously damp surfaces.

PRODUCT			LOGÍSTICA	
REF.	DESCRIPTION	MEASURE	PCS/BOX	PCS/PALLET
ILU5100	G-FLEX ROLL	1 x 14 m · 14 m <sup>2</sup>	1	12
ILU5200	G-FLEX ROLL	1 x 30 m · 30 m <sup>2</sup>	1	20

## MAXIMUM PROTECTION, ZERO BREAKAGE

The G-FLEX membrane is notable for its ability to **distribute loads**, which helps to protect cladding on large surfaces like terraces, squares, or high-traffic areas such as car parks or car dealerships.

This advantage is even greater for **large-format, thin ceramic** installations.

## EXAMPLE OF OUTDOOR AND INDOOR INSTALLATION

The G-FLEX membrane is suitable for use both indoors and outdoors. The tiling is protected by its ability to adapt to the movements of the subfloor, which evenly distributes heavy loads over the entire surface and prevents the ceramic from being affected by contraction or expansion. An ideal option for safeguarding ceramics, particularly those with small thicknesses and large formats.

Furthermore, its waterproof property provides an extra layer of protection against potential leaks or dampness, guaranteeing the longevity and integrity of your surfaces.

Thanks to the effectiveness of G-Flex in releasing and dissipating moisture from the floor slab in new construction, we can install in areas with high rainfall, even on previously damp surfaces, without having to wait for them to dry out.

## INSTALLATION AGAINST NEGATIVE PRESSURE AND CAPILLARITY MOISTURE

Negative pressure moisture can be defined as the ability of water to infiltrate from the exterior of the house to the interior, potentially causing defects in the wall, the appearance of molds, unpleasant odors, and material detachment.

This type of problem often occurs in underground constructions, specifically in walls adjacent to embankments, garages, basements, or moisture rising by capillarity from the subsoil due to a high water table.

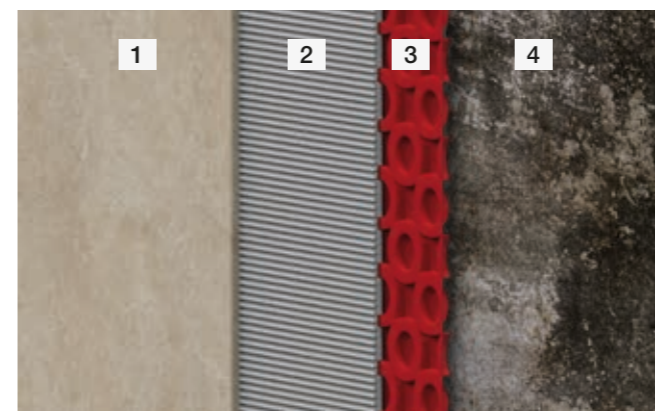

G-FLEX is a very useful solution to combat negative pressure moisture, as the space created between the waterproof membrane and the ground or wall allows moisture to escape from the construction, dissipating into the air and not affecting the structure.

REF.	DESCRIPTION	FORMAT
IG68000	G-WASHER (250 UNITS)	BOX

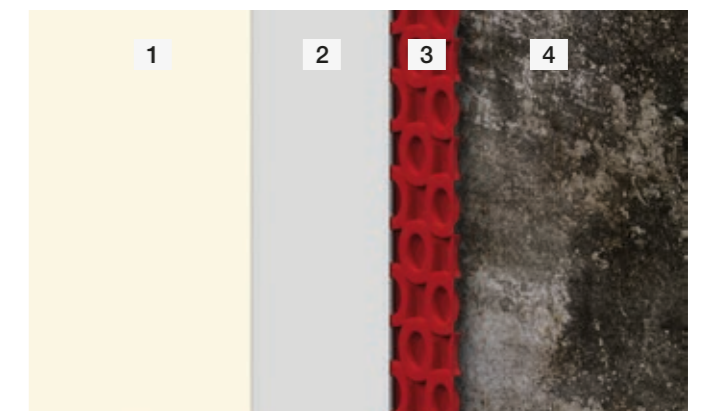

The use of screws 5/6 mm thick and suitable wall plugs for the type of wall is recommended.

**Negative humidity with ceramic finish**

- 1- Ceramics. 2- C2 Cement Glue.
- 3- G-FLEX. 4- Wet wall.

**Negative moisture plastered and painted**

- 1- Painted wall. 2- Plaster.
- 3- G-FLEX. 4- Wet wall.

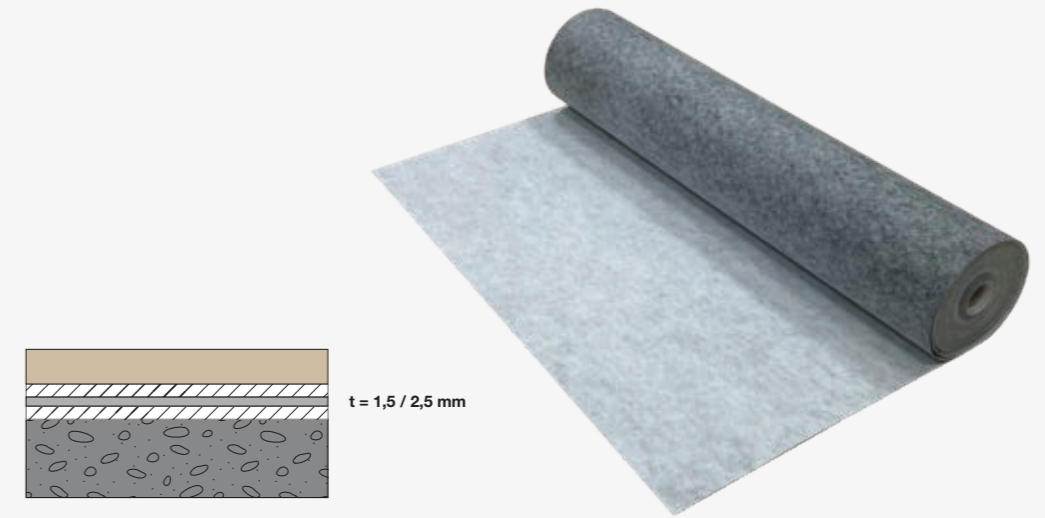

**IMPACT MEMBRANE G-SOUND**

Scan the QR code and discover more

**G-SOUND: The tranquillity of silence**

IDEAL FOR RENOVATIONS

**Features**

- » Minimum installation thickness: 3,5 mm with C2 - 1,5 / 2,5 mm membrane (depending on the model)
- » It can be used for waterproofing and decoupling
- » Easy to work with, flexible and manoeuvrable
- » Higher compressive strength than the materials currently available
- » Balancing lightness and accessibility
- » Multifformat and multiproduct ceramic: it can be used with various types of cladding, paving, or natural stone

**Specifications**

- » Total weight: 440 gr/m<sup>2</sup> (G-SOUND) and 590 gr/m<sup>2</sup> (G-SOUND PREMIUM)
- » Total product thickness: 3 mm
- » Made from recycled products
- » Noise reduction and complete waterproofing

G-SOUND is a range of innovative products that effectively **reduce the impact noise levels** by 14 dB to 21 dB, while also saving space. A thick mortar bed is not needed for this bonded membrane. The **total thickness required for installation is less than 1 cm.**

G-SOUND not only reduces noise but also excels in **renovation projects** and **includes waterproofing** features. This dual functionality provides protection against both disturbing noise and **moisture.**

Improve your spaces with G-SOUND impact membrane and enjoy the peace of mind you deserve.

PRODUCT			LOGISTICS

4000	71,2	31,2
5000	70,3	33,7

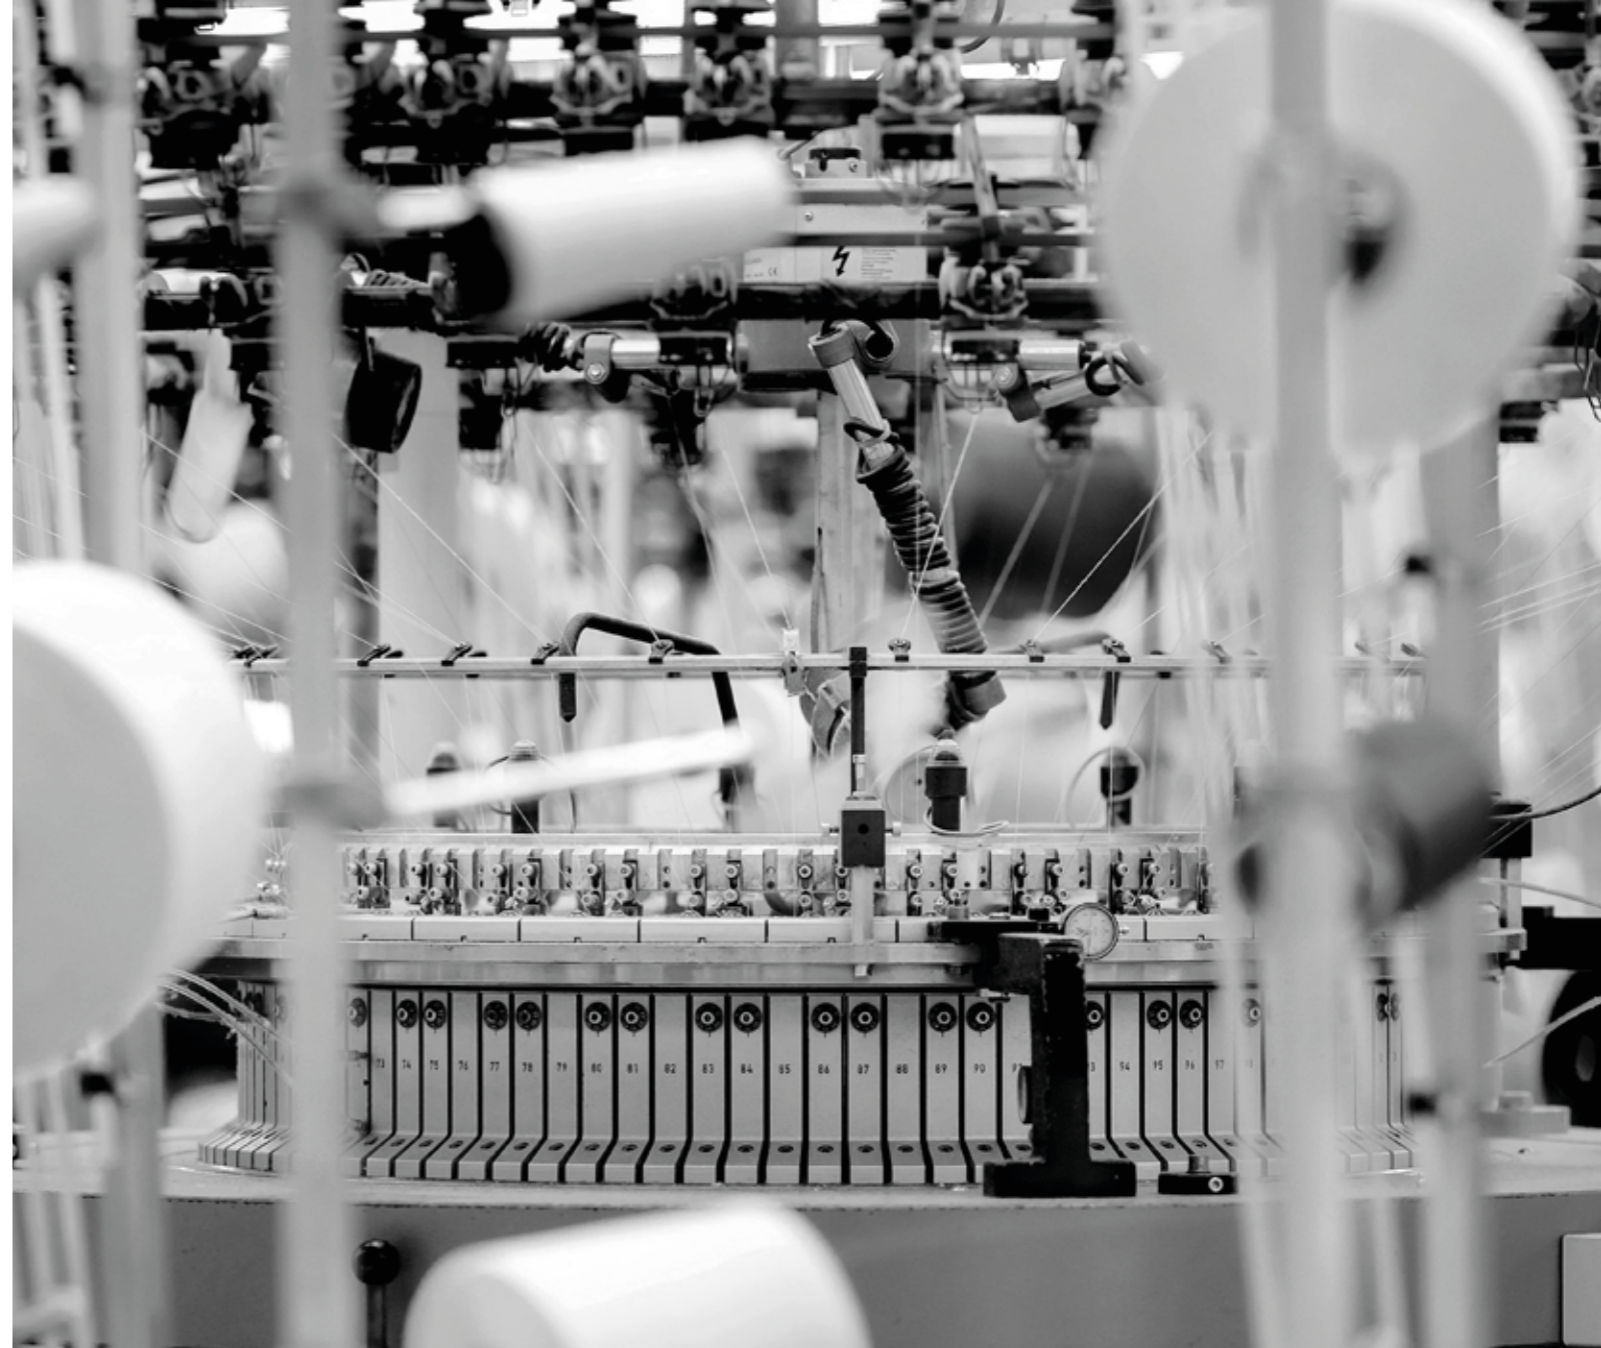

Assessment according to the international standard ISO 717-2

ΔL<sub>w</sub> = 15 dB

C<sub>i,A</sub> = -10 dB  
C<sub>i,r</sub> = -1 dB

These results are based on tests conducted with an artificial source under laboratory conditions (engineering method).

The G-SOUND impact sheet has been designed to provide an impenetrable defense against noise resulting from impacts. To achieve this, G-SOUND has not only passed but has far exceeded all the rigorous tests to which it has been subjected.

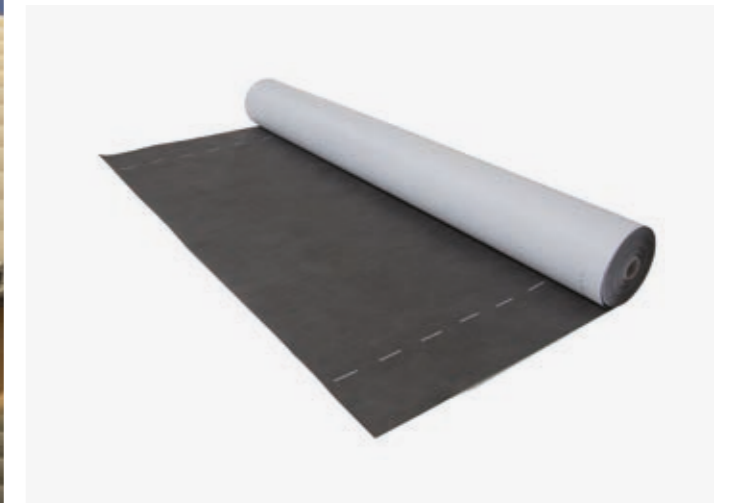

We have conducted exhaustive tests using the Sound Reduction Index, in accordance with the strict UNE-EN ISO 10140-3:2022 and UNE EN ISO 10140-1:2022 standards. The results are more than promising: G-SOUND has demonstrated its exceptional ability to absorb and dissipate impact noise, rising well above the standards.

The tests precisely measured the reduction of impact noise transmitted through floor coverings on typically heavy floors. The superior performance of G-SOUND not only complies with the most demanding regulations but redefines them.

It is worth noting that the assessment of results has been carried out according to the international ISO 717-2 standard and is based on tests under laboratory conditions (engineering method).

## BREATHABLE MEMBRANE W-S AIR

It is a membrane that is impermeable to liquid water but allows water vapour to pass through. This membrane is used for vapour control on sloping roofs and ventilated façades. It should be installed under the protection and on the load-bearing structure, resting on the beams or on the deck (concrete slab, wood, panels...) or directly on the thermal insulation.

### Features

- » Totally watertight
- » High vapour permeability
- » Simple installation (overlap marking)
- » Protection of the structure from the effects of moisture
- » Prevents heat loss through convection and condensation

### Specifications

- » Microporous film
- » Thickness: 0,4 mm
- » Non-woven veil on both sides

\* Performances/consumption for bonding and sealing joints between sheets according to the type of joint:

Overlap of WATER-STOP membrane	± 0,16 kg/m	1 kg ≈ 16 m
WATER-STOP membrane with joint cover W-S BAND 14	± 0,22 kg/m	1 kg ≈ 6 m
G-FLEX membrane with W-S BAND 14 band	± 0,30 kg/m	1 kg ≈ 3 m

ANTI-LEAK BAND **SAFEBAND**

Scan the QR code and discover more

Say goodbye to silicone problems with **SAFEBAND!**

**Features**

- » Barrier on two different planes.
- » Elastic flexible material.
- » Fibres on both sides to improve adhesion to the substrate.
- » Extra strong fixative.
- » It has a rim height of 12 cm (rise/connection overlap).

**Specifications**

- » Grammage (gr): 250
- » Width (cm): 14
- » Length (m): 2, 3'5, 6, 30
- » Elongation: 65%

**GURU PATENTED PRODUCT**

SAFEBAND revolutionises the installation of **shower trays and bathtubs** with its multi-axial and flexible anti-leak strip. This addition ensures **tight joints with walls and floors** and serves as a superior **alternative to silicone**.

Why choose SAFEBAND? ESTIL GURU's **patented design** provides a strong hold and **double protection** against leaks, effectively addressing the issues associated with silicone, such as limited durability, mould and dampness, and the risk of leaks.

This advanced sealant **meets the strict requirements of DIN 18534** and has been thoroughly evaluated by the **independent Kiwa institute in accordance with ETAG 022:2**.

**Elements included:**

## BATHTUB

Ensure the safe and uncomplicated installation of bathtubs, while maximising their benefits. Thanks to SAFEBAND, waterproofing and sealing joints and connections between the bathtub, walls, and floor is made simple.

Extends the life of your installation, prevents future damage and adds the waterproof protection your bathtub needs.

## SHOWERS

SAFEBAND is an excellent solution for installing prefabricated shower trays. It eliminates concerns about limited-service life and is very easy to apply due to its flexibility and self-adhesive nature.

It effectively prevents leaks and possible imperfections, ensuring complete waterproofing in the connections between the shower tray, walls, and floor.

BATH KIT **W-S BATHKIT**

Waterproofing for bathtub drains!

Features

- » Waterproofing included
- » High drainage capacity
- » Available in different colours
- » Easy installation

Specifications

- » Click-Clack Valve
- » Built-in Overflow
- » PVD and Textured Finishes
- » Outlet Tube Ø40 mm

The W-S BATH KIT is a **click-clack drainage** system with overflow that is specifically designed for **bathtubs**.

The system guarantees a seamless connection between the WATER-STOP waterproofing membrane and the drain, **preventing** any form of **leakage or dampness**.

W-S BATHKIT includes:

W-S BATH includes:

Click-Clack valve with a swivelling siphon.

Stopper (stainless steel, black and gold finish).

Overflow.

Membrane WATER STOP 2 x 3 m.

Roll WATER STOP 1 x 5 m.

W-S MASTIC putty.

Estil Guru has developed and manufactured a range of advanced **outdoor** drainage systems specifically designed for patios, squares, terraces, or shelters, reflecting our innovative attitude.

These systems combine **efficiency and design**, elevating the standard of outdoor drainage to a new level.

Among these new options, you will find both one-time and continuous choices, allowing for adaptation to various outdoor spaces and any type of need.

MODULAR LINEAR DUCT FOR OUTDOOR USE RAYNEX

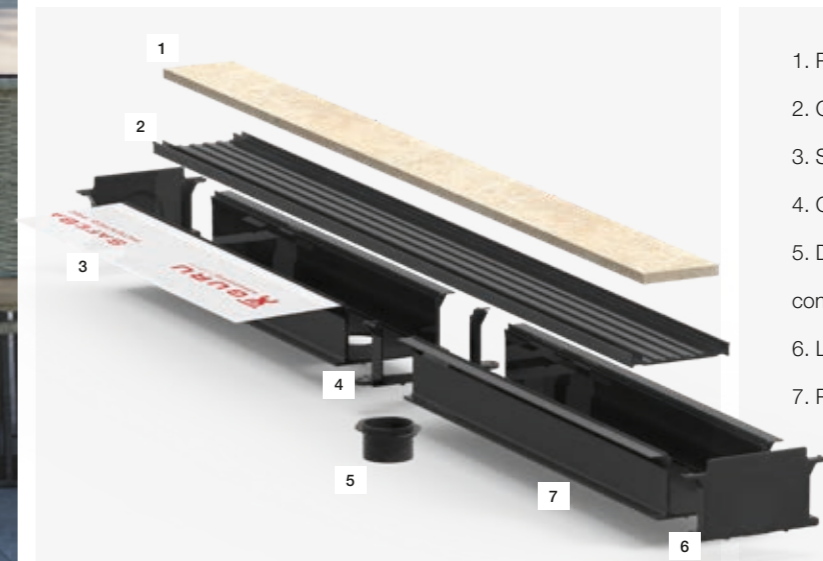

Scan the QR code and discover more

In this case, the outside does matter, AND A LOT!

RAYNEX provides an optimal external drainage solution. The **waterproofing built** into the system ensures optimal watertightness. Additionally, the **low-profile design** allows it to blend seamlessly into various outdoor spaces while maintaining high water management efficiency.

Discover the best in versatility with **customisable accessories** that meet the unique requirements of your project. Its **strength and lightness** make it capable of withstanding vehicular loads without compromising its integrity, making it an ideal choice for almost any outdoor application.

- 1. Paving
- 2. Grid
- 3. SafeBand membrane
- 4. Connecting piece
- 5. Downpipe or for lateral connection (Ø50 mm)
- 6. Lateral piece
- 7. PVC gutter

**Features**

- » Pavementable and removable grid for cleaning.
- » Adaptable to construction.
- » Material with UV protection for outdoor exposure.
- » Lightweight yet sturdy material, certified.
- » High drainage capacity.
- » Integrated low-weight waterproofing in the channel.
- » Supports vehicular traffic up to 3 tons.

**Specifications**

- » EN1433
- » Class A15 for light traffic
- » Open area: 6000 mm<sup>2</sup>/meter
- » Installation height: 60 mm + pavement

## OUTDOOR DRAIN KIT TERRACE

This product is notable for its precise manufacturing process using **high-quality** materials that are specifically designed to withstand **corrosion, weathering, and temperature changes**. By meeting the most rigorous **quality standards**, this product guarantees **exceptional durability** and optimal performance over time. The innovative design facilitates installation, providing an efficient solution for both professional and non-specialist users.

This product is characterised by its **simplicity** and **efficiency** in installation. Each component has undergone thorough quality testing to ensure structural integrity and optimal performance in various environmental conditions. In addition to its excellent quality, this product is also affordable, striking a **perfect balance** between **durability, performance, and price competitiveness**.

# SHOWER SYSTEMS WITH WATERPROOFING INCLUDED

Estil Guru shower systems have exclusive designs and technologies that improve drainage and facilitate waterproofing of bathrooms.

Our philosophy has always been to combine design with efficiency, creating stainless steel systems that are integrated for microcement and available in various sizes, designs, and colours.

Furthermore, all our drainage systems are equipped with waterproofing and can be selected with various drainage options to meet any requirement

waterproof membranes

**DRAIN TRYPHON**

Join the new generation of drainage systems featuring removable siphons

**TRYPHON DRAIN ACCESSORIES:**

REF.	DESCRIPTION
IG60031	TRYPHON REDUCED SIPHON TRAP
IG60032	TRYPHON VERTICAL SIPHON TRAP

TRYPHON is the perfect fusion of functionality and innovation. TRYPHON offers a **removable siphon** for easy cleaning and a(n) (optional) soundproofing box, revolutionising bathroom drainage.

TRYPHON provides **two siphon options - mechanical and hydraulic** - to meet specific requirements. The drain can be easily integrated into existing configurations due to its **multi-directional adjustability** and **ground-level installation**, when combined with the mechanical siphon. Furthermore, TRYPHON **incorporates factory heat-sealed waterproofing** to provide durable protection.

TRYPHON guarantees exceptional performance with an impressive evacuation flow rate ranging from 30 L/min to 68 L/min, which exceeds the standard requirement of 24 L/min. The self-cleaning function reduces the need for constant maintenance. Additionally, three outlet flow options are available: **horizontal, reduced height horizontal, and vertical**, providing installation flexibility. We emphasise the **vertical outlet** option as an innovative feature that is not commonly found in the market. This feature brings versatility and efficiency to your project.

**TRYPHON**

**Front outlet**

Pavementable design, now more reinforced.

- 1. Evolux Integra grille
- 2. Hair collector
- 3. Siphon
- 4. Evolux Integra gutter
- 5. Water-Stop membrane
- 6. Adapter
- 7. Siphon Trap

**Features**

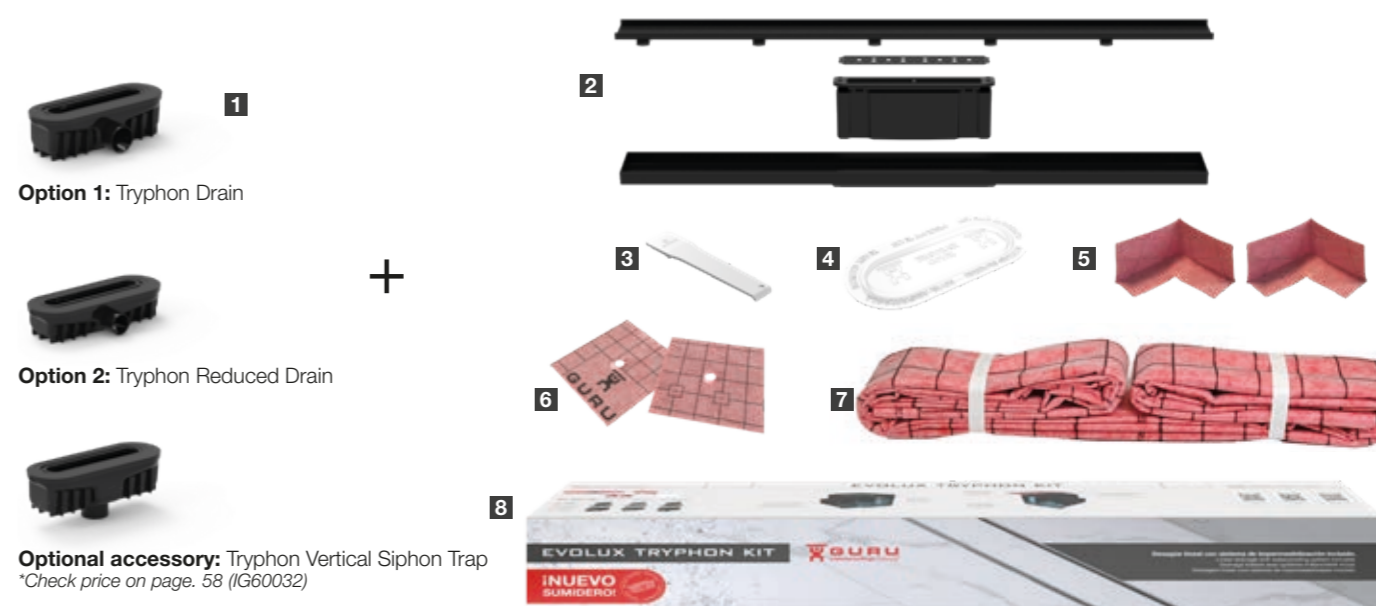

- » Reinforced structure
- » Maximum strength with minimal weight
- » Included waterproofing
- » High drainage capacity
- » Easy installation
- » Effective cleaning
- » 10-year warranty

**Specifications**

- » Stainless steel AISI 304 channel with textured paint
- » Aluminum grate with textured paint
- » Slots with dovetail to maximize adhesive grip
- » Installation height:
  - » Self-centering grate using centering feet

**Option 1:** Tryphon Drain

**Option 2:** Tryphon Reduced Drain

**Optional accessory:** Tryphon Vertical Siphon Trap  
\*Check price on page. 58 (IG60032)

The new **reinforced model of INTEGRA** represents an enhanced version of its predecessor, the integrated drain. This innovative piece has been meticulously designed to deliver exceptional performance in large ceramic applications, ensuring increased durability and stability during installation.

A distinctive feature is its **dovetail system**, ensuring optimal grip on ceramic pieces, facilitating their precise and secure placement. Additionally, it features an **invisible edge** that provides an aesthetic and elegant finish to the installation, keeping the focus on the design and beauty of the ceramics.

Manufactured in **6016-T6 aluminum**, it combines **strength** and **lightness**, making it the ideal choice for projects that demand high performance and quality. INTEGRA FORCE is the perfect solution for those seeking a combination of functionality and aesthetics in their ceramic projects.

- 1- Drain of choice. 2- Evolux Integra Tryphon channel and grate with siphon and embellisher (model and size of choice). 3- Grate remover. 4- Mortar level cover.
- 5- W-S DIN x2 (inside corners). 6- W-S TUB x2 (pass-through pipes). 7- WATER-STOP sheet with thermosealed adapter (2 x 2 m). 8- Evolux Tryphon Kit box.

COMPLETE SHOWER KIT **EVO SYSTEM**

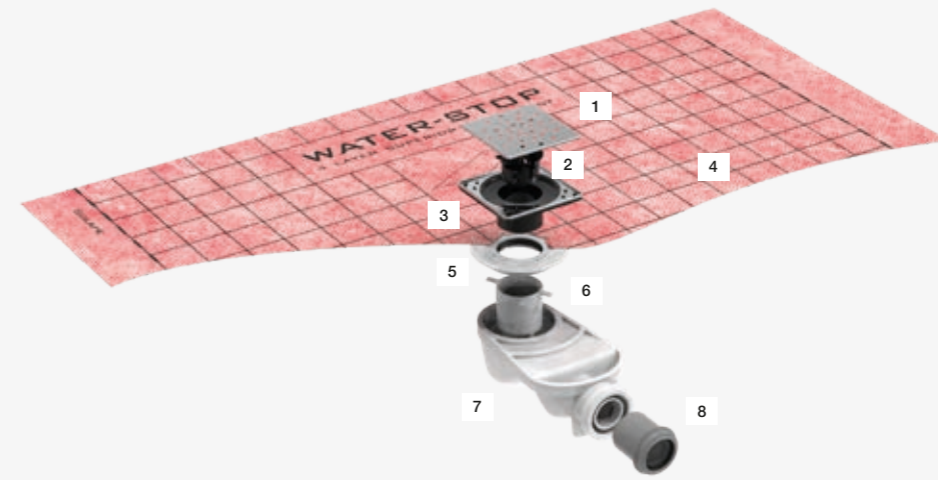

Scan the QR code and discover more

Efficiency at the best price

The EVO System is a **shower system** that includes **waterproofing around the drain** to provide protection against water damage in areas with floor drainage.

The product comprises a trap drain with a low profile, a WATER-STOP waterproof sheet that is pre-attached and sealed to a special adapter for connecting to the drain, and a stainless-steel grille with an ABS bowl.

1. Evo grille
2. Hair collector
3. EVO Shower drain
4. Water-Stop membrane
5. Adapter
6. Ruber shower head
7. Ruber siphonic body
8. Reducer Ø 50/40 mm

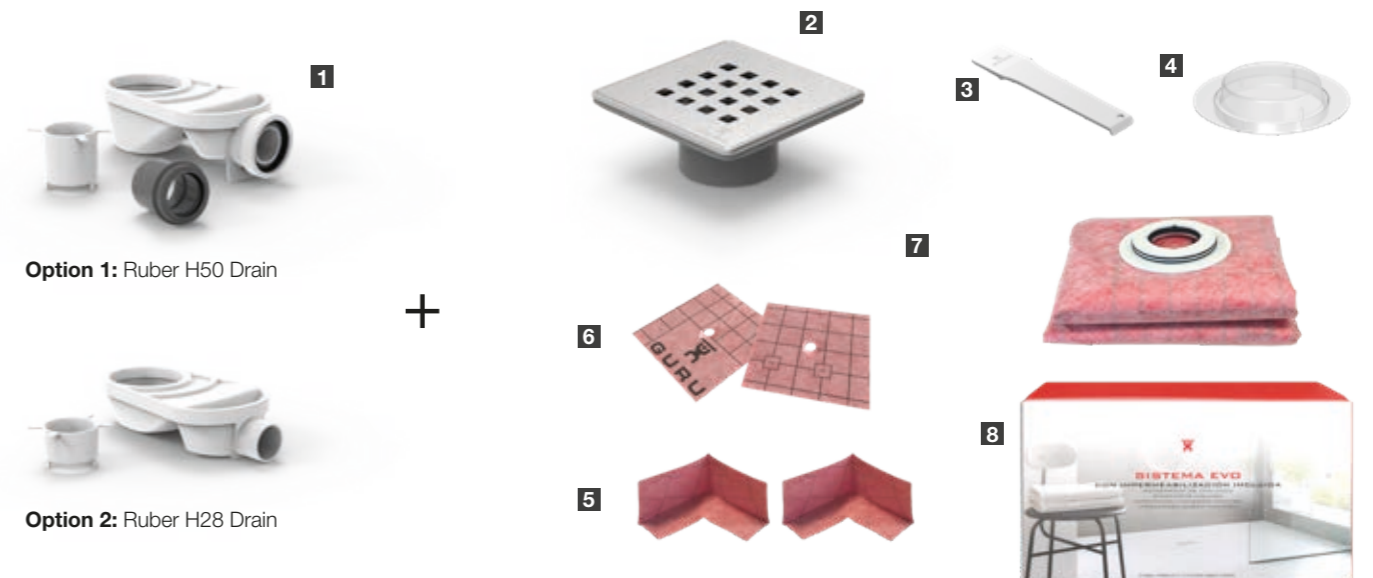

**Features**

- » Waterproofing included
- » Drainage position: 60 cm from the edge
- » High drainage capacity
- » Easy installation
- » Effective cleaning
- » 10-year warranty

**Specifications**

- » Elastic joints
- » Secondary drainage
- » 360° adjustable
- » Minimum installation height: 90 mm (Ruber H50 drain)
- » Minimum installation height: 70 mm (Ruber H28 drain)

**The system includes**

1- Drain of choice. 2- ABS cup and stainless steel grate (model of choice). 3- Grate remover. 4- Mortar level cover. 5- W-S DIN x2 (inside corners). 6- W-S TUB x2 (pass-through pipes). 7- WATER-STOP membrane with thermosealed adapter (1.5 x 2 m). 8- Evo box.

- 6- W-S TUB x2 (pass-through pipes). 7- WATER-STOP membrane with thermosealed adapter (2 x 2 or 2.5 x 2.5 m). 8- Evolux Ruber Kit box.

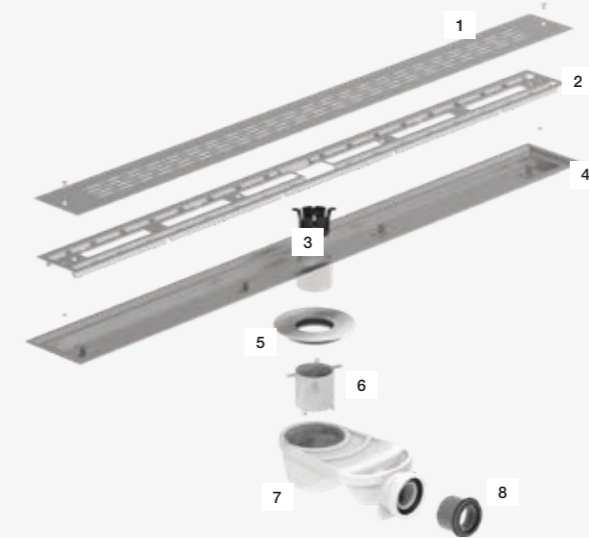

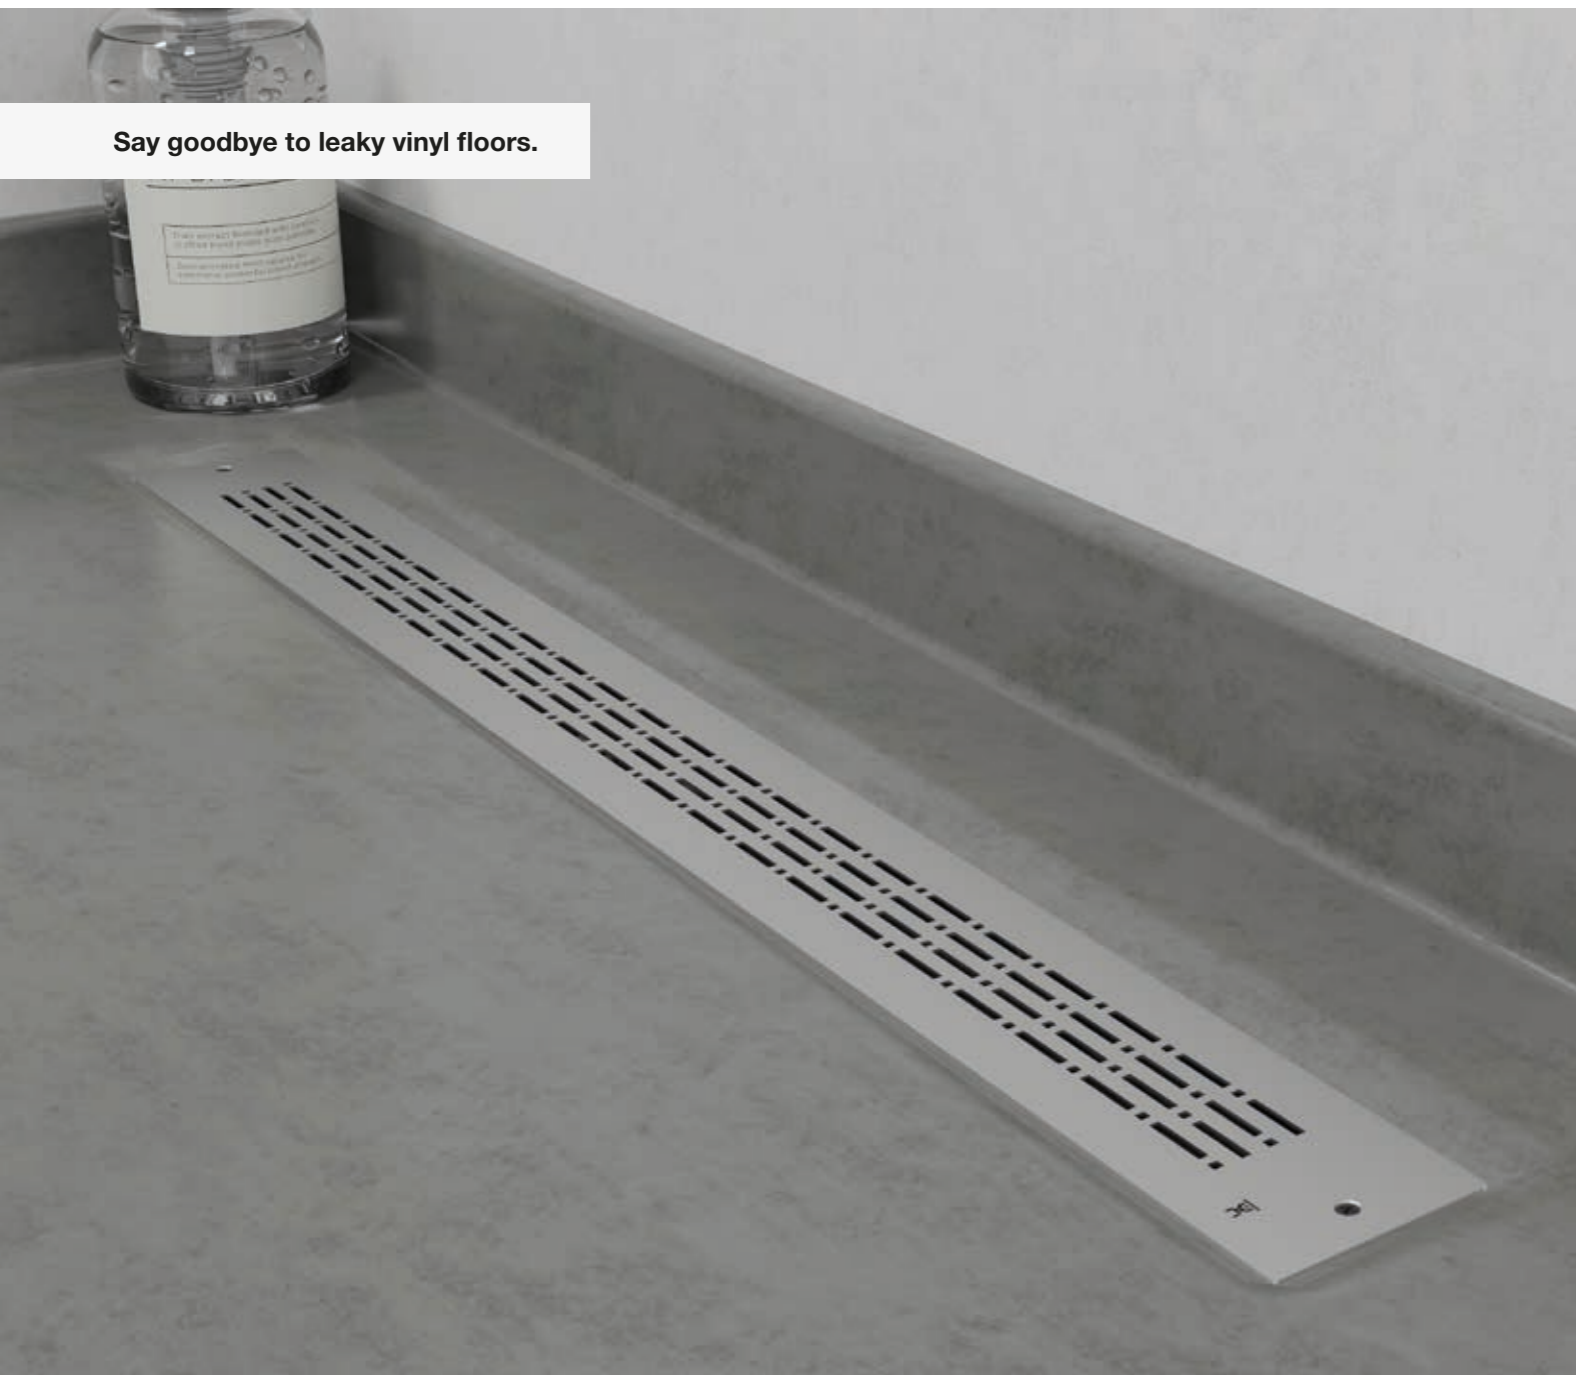

## SHOWER KIT FOR VINYL FLOORS **EVOLUX VINYL**

Scan the QR code and discover more

Say goodbye to leaky vinyl floors.

1. Evolux Vinyl grille
2. Framework
3. Hair collector
4. Vinyl Trough
5. Adapter
6. Rubber shower head
7. Rubber siphonic body
8. Reducer Ø 50/40 mm

### Features

- » Stainless steel structure
- » Watertightness assured
- » High drainage capacity
- » Hair collector included
- » Self-cleaning
- » Easy installation

### Specifications

- » Adjustable clamp from 1 mm to 5 mm
- » Antivandal
- » Stainless steel AISI 304

EVOLUX VINYL is our newest **vinyl floor drain** innovation. It is notable for its ability to maintain a waterproof seal in bathrooms and changing rooms, while also being **easy to install**.

This kit comprises a gutter and a frame with a trim. It uses a watertight clamping system with MS putty to enable the installation of drainage in technical floors of hospitals, laboratories, wet rooms, etc.

SHOWER SHELVES **SHELF**

Scan the QR code and discover more

Install your shower shelf without the need for any construction work!

- Inox
- Dark
- Light
- Gold
- Nickel

**Features**

- » Easy installation in renovations and new constructions
- » Unique aesthetic finishes
- » Standard: UNE67100
- » No-drill installation (no risk of pipe breakage or loss of waterproofing)

**Specifications**

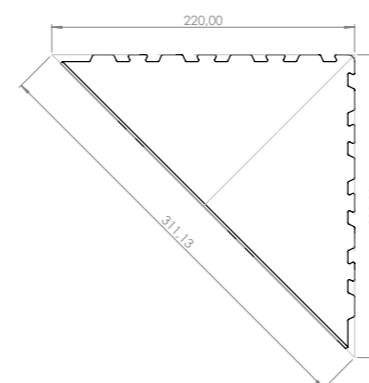

- » Thickness: 1 mm
- » Made of AISI 316 Stainless Steel - Marine Grade
- » Finishes in PVD, textured, and satinized

SHELF is a **shower shelf** that **eliminates the need for drilling** or any other form of installation that may damage walls or require building work.

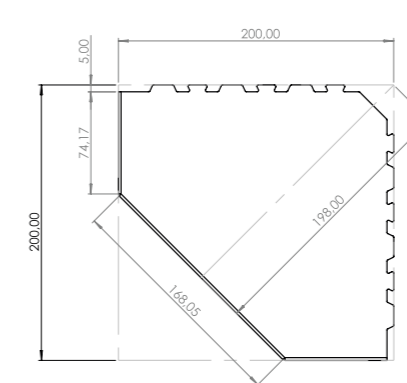

Made from **AISI 316L stainless steel**, this product is highly resistant to corrosion, offering both durability and aesthetic appeal. Its design with 1 mm thickness **allows installations in joints of 1.5 mm between tiles**.

It is notable for its capacity to **support weights heavier than the standard** and for its **speedy and efficient installation**, taking less than 30 minutes.

**DRY CONSTRUCTION PANEL W-S BOARD**

Scan the QR code and discover more

**Waterproof and build simultaneously... No building work required!**

**Features**

- » Reduces installation time
- » Available sizes:  
910 x 1520 / 2600 x 625 / 2440 x 1220 mm
- » Available thicknesses: 12.5 / 50 mm

**Specifications**

- » Compression Strength:  
400 KPA - 50 PSI
- » Thickness from 12,5 mm to 50 mm
- » 0.3 perms - ideal for steam shower

W-S BOARD is a **waterproof drywall construction panel** that is versatile, **easy to cut**, and **adaptable** to various construction scenarios.

With a **variety of thicknesses and sizes** available, it is suitable for any project, from residential to industrial construction.

Its **waterproof** feature provides resistance to moisture and offers long-lasting protection against leaks and condensation. Furthermore, its consistent flatness ensures **uniform finishes** and a **strong grip** on the ceramic itself.

The dry installation system with **screw fixing** accelerates the construction process, reducing both **time and costs**.

# GURU CUSTOMISED

## GURU IN PROJECTS

We can customise the shower grates with your logo, brand, city... whatever design is required to create a unique experience for your hotel!

## GIVE IT A PERSONAL TOUCH!

Estil Guru creates custom projects to enhance the hospitality experience. Our focus is on two crucial aspects: structural waterproofing and customising bathrooms with high-end showers.

During the waterproofing phase, Estil Guru will conduct a thorough evaluation of the structure, identifying vulnerable areas and preventing any moisture-related issues. Simultaneously, we will analyse the requirements and products that are most appropriate for each situation: Bathroom, spa, shower, terrace, room, deck, patio, swimming pool...

Our focus is also on shower systems, creating modern and personalised spaces to provide unique experiences. This statement highlights not only our dedication to creating modern, leak-free bathrooms but also our commitment to sustainability and competitive differentiation in the shower and waterproofing sector.

Additionally, we would like to emphasise the meticulous planning of our technical team. They carefully schedule all tasks to minimise any inconvenience to our clients and prepare the budget with a commitment to providing the best value for money and the highest quality.

# GURU SANITARY

## GURU IN HOSPITAL AND NURSING HOME PROJECTS

We design bespoke, integrated projects for hospitals and care homes. Our focus is on the construction and renovation of essential spaces. We ensure durability and resistance by waterproofing all necessary areas. Additionally, we design modern and functional bathrooms and communal areas.

Our approach centres around waterproofing, which involves a thorough assessment of structures. We conduct customised studies to identify vulnerable areas and prevent leaks and damp-related problems. We then recommend the best solution for each case.

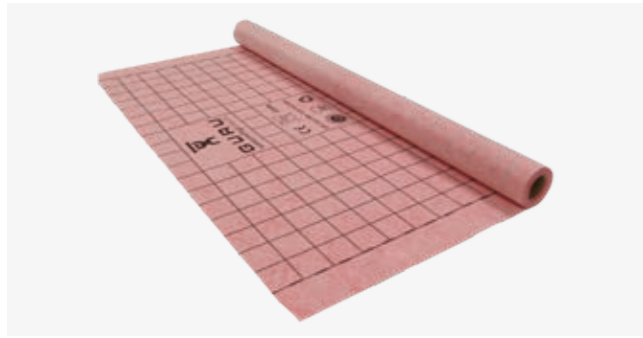

Our innovative shower systems, including waterproofing with Evolux Vinyl, set us apart in the industry. This shower system is designed and manufactured to be integrated into vinyl floors of hospitals and nursing homes, ensuring waterproofing and high drainage effectiveness.

At Estil Guru, every project is a testament to our dedication to quality, sustainability, and elevated comfort. We strive to create spaces that make a difference in everyday life.
